

# ALI ARSALAN

## Senior Software Engineer

+966 500 139 889 | [aliarsalan177@gmail.com](mailto:aliarsalan177@gmail.com) | [linkedin.com/in/ali-arsalan-517262156](https://linkedin.com/in/ali-arsalan-517262156) | [github.com/aliarsalan177](https://github.com/aliarsalan177) | [aliarsalan177.github.io](https://aliarsalan177.github.io)

## PROFILE

Senior software engineer with 8+ years building scalable SaaS and e-commerce platforms using React, Next.js, TypeScript, Node.js, and the Magento 2 ecosystem. Experienced in frontend architecture, design systems, micro-frontends, and high-performance web applications. Strong background in REST/GraphQL API design, CI/CD automation, containerized infrastructure (Docker, Kubernetes, AWS), and self-managed Linux operations, with recent hands-on work in AI integrations, RAG pipelines, and LLM-powered workflows. Track record of leading platform migrations end-to-end, mentoring engineers, and owning the full stack from backend modules to frontend delivery.

## KEY ACHIEVEMENTS

- **AI integration** — Built end-to-end RAG and agentic AI workflows using OpenAI APIs, vector databases, and modern LLM tooling; applying AI integrations within full-stack applications and internal developer automation.
- **Architecture & design systems** — Architected a Single-SPA micro-frontend ecosystem (React, Vue, Next.js) at Salla and built the shared SDK / UI component library (Stencil.js Web Components, TypeScript, Tailwind) adopted across every engineering squad.
- **Performance engineering** — Consistently delivered Lighthouse 90+ scores across multiple production platforms via bundle analysis, code splitting, lazy loading, caching strategies, and Core Web Vitals optimization.
- **Full-stack & DevOps ownership** — Solo end-to-end ownership across multiple senior roles: Magento 2 module development, React PWAs, custom REST/GraphQL APIs, Docker/Kubernetes containerization, CI/CD pipelines, and self-managed Linux infrastructure.
- **JavaScript expertise** — Deep ES6+ and TypeScript fundamentals — closures, prototypes, async patterns, event loop, performance — enabling framework-agnostic fluency across React, Next.js, Vue, SolidJS, and Stencil.js Web Components.

## CORE SKILLS

**Languages:** TypeScript, JavaScript, Python, PHP, SQL

**Frontend:** React, Next.js, Vue, Stencil.js (Web Components), Redux, Zustand, TanStack Query, Storybook, Tailwind, ShadCN UI

**Backend:** Node.js, Nest.js, FastAPI, Laravel, REST APIs, GraphQL, microservices, event-driven patterns, WebSockets (SignalR)

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, OpenSearch

**Infrastructure:** Docker, Kubernetes, AWS, Cloudflare, GitHub Actions, GitLab CI, Vercel, Linux

**AI & LLMs:** OpenAI APIs, RAG pipelines, vector databases, AI agents, prompt engineering

**Testing & Quality:** Jest, Vitest, Cypress, Playwright, RTL; unit & integration testing, code review

**Leadership:** Technical leadership, mentoring, cross-functional collaboration, Agile/Scrum, system design

## PROFESSIONAL EXPERIENCE

### Senior Frontend Engineer (Platform Engineer) · Salla E-Commerce Platform

Sep 2023 – Present · Saudi Arabia

- Frontend engineer on Salla 4.0, contributing to the merchant dashboard experience for one of the region's leading SaaS e-commerce platforms.
- Architected and developed modular frontend applications using Single-SPA to support independently deployable merchant dashboard modules.
- Built and maintained the shared UI component library and SDK using Stencil.js Web Components, TypeScript, Tailwind CSS, and SCSS, enabling consistency across merchant-facing applications.
- Implemented authentication, authorization, and state management workflows using OAuth, JWT, Redux, and Zustand for secure and scalable dashboard experiences.
- Enhanced merchant dashboard performance by optimizing Core Web Vitals with code splitting, lazy loading, and caching strategies.
- Established frontend testing and CI/CD standards using Jest, Vitest, Cypress, and React Testing Library; mentored engineers on scalable frontend architecture and performance-focused development practices.

### Full Stack Engineer (Part-Time) · Confidential (B2B Travel-Tech)

Mar 2026 – Present · Saudi Arabia

- Founding engineer on a B2B AI-powered hotel booking platform serving travel agencies, tour operators, and corporate travel managers; product at MVP stage.

- Built the React/TypeScript frontend with TanStack Query for server-state management, alongside shared UI primitives for the booking workflow.
- Implemented real-time pricing and availability updates over WebSockets (SignalR), syncing wholesale rates from supplier feeds into the booking UI.
- Integrated LLM-powered hotel search (natural-language queries against wholesale inventory) and contributed to the platform's broader AI roadmap: dynamic pricing, demand forecasting, and automated booking workflows.

#### Full Stack Engineer · [MageGuide](#)

*Jul 2021 – Sep 2023 · Athens, Greece (Remote)*

- Delivered production e-commerce platforms for major Greek retail brands including Hondos Center ([hondoscenter.gr](#)), Attrattivo ([attrattivo.gr](#)), and Apivita.
- Architected high-performance React PWAs integrated with Magento 2 via custom GraphQL APIs — owned both backend API layer and frontend integration.
- Engineered complex backend modules including a Return Management System (RMS) as a standalone module with its own GraphQL schema — service-oriented decomposition of a Magento monolith.
- Integrated OpenSearch and Algolia for sub-second product and content search; tuned indexes and query patterns for high-cardinality catalog data.
- Performance engineering across all client sites — bundle analysis, code splitting, lazy loading, and caching — delivering Lighthouse 90+ scores.

#### Senior Software Engineer · [Edenrobe](#)

*Nov 2020 – Nov 2022 · Karachi, Pakistan*

- Solo full-stack lead: owned end-to-end delivery across Magento 2 backend module development, React PWA frontend, custom REST/GraphQL APIs, and infrastructure.
- Designed and built custom Magento 2 modules including a shipping and logistics integration with ERP for real-time order tracking and merchant dashboard updates.
- Architected React-based PWAs decoupled from Magento for fast, mobile-first experiences; delivered Lighthouse 90+ scores via performance optimization.
- Migrated multi-brand infrastructure to containerized Docker/Kubernetes environments with full CI/CD pipelines (GitHub Actions, Bitbucket Pipelines).
- Set up and managed self-managed Linux servers (Nginx, Apache) with New Relic monitoring, Cloudflare WAF and edge caching, mail server migration, and end-to-end security hardening; mentored junior developers through platform migrations.

#### Senior Software Engineer & Team Lead · [Al-Hafiz \(Deedo.pk\)](#)

*Dec 2018 – Nov 2020 · Karachi, Pakistan*

- Solo end-to-end ownership: led the team, ran code reviews, mentored developers, and managed deployment and server operations on self-managed infrastructure.
- Developed custom Magento 2 modules powering Pakistan's first React.js PWA storefront — built the entire frontend from scratch.
- Built scalable e-commerce architecture with a ReactJS frontend and Magento 2 backend, deployed on self-managed servers with Cloudflare for security, performance, and global caching.
- Set up complete CI/CD pipelines and delivered consistent Lighthouse 90+ scores through performance engineering — fast load times, responsive design, and optimized assets; integrated SEO and marketing tooling including Google Analytics 4.

#### Magento Developer & Team Lead · [Surmawala.pk](#)

*Oct 2017 – Dec 2018 · Karachi, Pakistan*

- Lead developer owning the full delivery stack: Magento 2 backend module development, frontend integration, server operations, and team coordination.
- Developed custom Magento 2 modules and templates for one of Pakistan's largest electronics retailers; built internal Laravel tooling to automate workflows and integrations.
- Managed Linux server infrastructure including security patches, performance tuning, and PCI compliance for transactional workloads.
- Optimized storefront performance through caching, code improvements, and responsive design for high-traffic flash-sale events.

## CERTIFICATIONS, RECOGNITION & EDUCATION

- Invited Speaker, **ScandiPWA Spring Meetup 2021** "Revolution in e-commerce with ScandiPWA"; talk featured in the **Progressive Web Apps publication on Medium** [read article](#).
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents — Udemy · *Apr 2026*
- JavaScript: The Advanced Concepts — Zero To Mastery · *Oct 2025*
- Next.js Developer — Zero To Mastery · *Jan 2022*
- React Developer (w/ Redux, Hooks, GraphQL) — Zero To Mastery · *Aug 2019*
- **BSc Computer Science, Emaan Institute of Management and Sciences, Karachi** · *2019 – 2023* · NACES/IEE: U.S. equivalent
