PROFILE

Senior software engineer with 8+ years building scalable SaaS and e-commerce platforms across React, Next.js, TypeScript, Node.js, and the Magento 2 ecosystem, plus cross-platform mobile delivery via React Native (iOS). Founding member of the Platform team at Salla, the region's leading SaaS e-commerce platform (68,000+ merchants, up to 15M daily transactions), with deep experience in frontend architecture, design systems, micro-frontends, and high-performance web and mobile apps. Strong across REST/GraphQL API design, CI/CD automation, containerized infrastructure (Docker, Kubernetes, AWS, Azure), and self-managed Linux operations, plus recent hands-on work in AI integrations, RAG pipelines, and LLM-powered workflows. Track record of leading platform migrations end-to-end, mentoring engineers, and owning the full stack from backend modules to frontend and mobile delivery.

KEY ACHIEVEMENTS

- **Founding Platform-team engineer at Salla:** architected the Single-SPA micro-frontend ecosystem (React, Vue, Next.js) and shared UI SDK adopted by every engineering squad, powering 68,000+ merchants and up to 15M daily transactions.
- **AI integration:** built end-to-end RAG and agentic AI workflows using OpenAI APIs, vector databases, and modern LLM tooling; applied within full-stack apps and internal developer automation.
- **Performance engineering:** consistently delivered Lighthouse 90+ scores across production platforms via bundle analysis, code splitting, lazy loading, caching, and Core Web Vitals optimization.
- **Full-stack & DevOps ownership:** solo end-to-end ownership across multiple senior roles including Magento 2 module development, React PWAs, custom REST/GraphQL APIs, Docker/Kubernetes, CI/CD pipelines, and self-managed Linux infrastructure.
- **Next.js at scale:** App Router, SSR, and RSC on production platforms; opinionated on rendering-strategy tradeoffs (SSG/ISR/SSR/RSC) and edge deployment via Vercel and Cloudflare Workers.
- **Cross-platform mobile:** React Native and Ionic applications targeting iOS with shared TypeScript codebases across web and mobile; consistent design-system and business-logic layers across platforms.
- **JavaScript expertise:** deep ES6+ and TypeScript fundamentals (closures, prototypes, async patterns, event loop, performance) enabling framework-agnostic fluency across React, Next.js, Vue, Angular, SolidJS, React Native, and Stencil.js Web Components.

CORE SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL

Frontend: React, Next.js (App Router / SSR / RSC), Vue, Angular, SolidJS, Stencil.js (Web Components), Redux, Zustand, TanStack Query, Storybook, Tailwind, ShadCN UI

Mobile: React Native, Ionic, iOS (React Native and native), cross-platform TypeScript codebases

Backend: Node.js, Nest.js, FastAPI, Laravel, REST APIs, GraphQL, microservices, event-driven patterns, WebSockets (SignalR)

Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch

Infrastructure: Docker, Kubernetes, AWS, Azure, Cloudflare, GitHub Actions, GitLab CI, Bitbucket Pipelines, Vercel, Linux

AI & LLMs: OpenAI APIs, RAG pipelines, vector databases, AI agents, prompt engineering

Testing & Quality: Jest, Vitest, Cypress, Playwright, RTL; unit & integration testing, code review

Leadership: Technical leadership, mentoring, cross-functional collaboration, Agile/Scrum, system design

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer, Platform · **Salla E-Commerce Platform**
Arabia

Sep 2023 – Present · Saudi

- Founding member of Salla's Platform team, powering Salla 4.0, the region's leading SaaS e-commerce platform serving 68,000+ merchants and up to 15M daily transactions.
- Architected the Single-SPA micro-frontend ecosystem (React, Vue, Next.js) that lets merchant-dashboard modules ship independently across engineering squads.
- Built and maintained the shared UI component library and SDK (Stencil.js Web Components, TypeScript, Tailwind CSS, SCSS), adopted platform-wide to standardize UI patterns across every squad.
- Implemented authentication, authorization, and state management workflows (OAuth, JWT, Redux, Zustand) for secure, scalable merchant dashboards.
- Drove merchant-dashboard performance via Core Web Vitals optimization, code splitting, lazy loading, and caching. Consistently held Lighthouse 90+ under enterprise concurrent load.
- Established frontend testing and CI/CD standards (Jest, Vitest, Cypress, RTL); mentored engineers on scalable frontend architecture and performance-focused practices.

Contract Full-Stack Engineer · MageBlue

Jul 2021 – Sep 2023 · Athens, Greece (Remote)

Independent contractor engagement running concurrent with primary employment through Nov 2022; converted to primary role thereafter.

- Delivered production e-commerce platforms for major Greek retail brands including Hondos Center (hondoscenter.gr), Attrattivo (attrattivo.gr), and Apivita.
- Architected high-performance React PWAs integrated with Magento 2 via custom GraphQL APIs, owning both backend API layer and frontend integration.
- Engineered complex backend modules including a Return Management System (RMS) as a standalone module with its own GraphQL schema (service-oriented decomposition of a Magento monolith).
- Integrated OpenSearch and Algolia for sub-second product and content search; tuned indexes and query patterns for high-cardinality catalog data.
- Performance engineering across all client sites (bundle analysis, code splitting, lazy loading, and caching), delivering Lighthouse 90+ scores.

Senior Software Engineer · Edenrobe

Nov 2020 – Nov 2022 · Karachi, Pakistan

- Solo full-stack lead: owned end-to-end delivery across Magento 2 backend module development, React PWA frontend, custom REST/GraphQL APIs, and infrastructure.
- Designed and built custom Magento 2 modules including a shipping and logistics integration with ERP for real-time order tracking and merchant dashboard updates.
- Architected React-based PWAs decoupled from Magento for fast, mobile-first experiences; delivered Lighthouse 90+ scores via performance optimization.
- Built the companion React Native iOS app for the multi-brand storefront, sharing TypeScript business logic and design tokens with the web PWA for a consistent customer experience across native and browser.
- Migrated multi-brand infrastructure to containerized Docker/Kubernetes environments with full CI/CD pipelines (GitHub Actions, Bitbucket Pipelines).
- Ran self-managed Linux server infrastructure end-to-end (Nginx, Apache) with New Relic monitoring, Cloudflare WAF and edge caching, and full security hardening; mentored junior developers through platform migrations.
- Migrated and operated a self-managed email server for the multi-brand e-commerce stack, handling transactional and marketing mail delivery, SPF/DKIM/DMARC configuration, deliverability tuning, and mail-flow monitoring.

Senior Software Engineer & Team Lead · Al-Hafiz (Deedo.pk)

Dec 2018 – Nov 2020 · Karachi, Pakistan

- End-to-end ownership: led the team, ran code reviews, mentored developers, and managed deployment and server operations on self-managed infrastructure.
- Developed custom Magento 2 modules powering Pakistan's first React.js PWA storefront; built the entire frontend from scratch.
- Built scalable e-commerce architecture with a ReactJS frontend and Magento 2 backend, deployed on self-managed servers with Cloudflare for security, performance, and global caching.
- Shipped a React Native iOS companion app alongside the React PWA storefront, extending customer engagement to native mobile with push notifications and offline browsing.
- Set up complete CI/CD pipelines and delivered consistent Lighthouse 90+ scores through fast load times, responsive design, and optimized assets; integrated SEO and marketing tooling including Google Analytics 4.

Magento Developer & Team Lead · [Surmawala.pk](#)

Oct 2017 – Dec 2018 · Karachi, Pakistan

- Lead developer owning the full delivery stack: Magento 2 backend module development, frontend integration, server operations, and team coordination.
- Developed custom Magento 2 modules and templates for one of Pakistan's largest electronics retailers; built internal Laravel tooling to automate workflows and integrations.
- Managed Linux server infrastructure including security patches, performance tuning, and PCI compliance for transactional workloads.
- Optimized storefront performance through caching, code improvements, and responsive design for high-traffic flash-sale events.

CERTIFICATIONS, RECOGNITION & EDUCATION

- **Invited Speaker, ScandiPWA Spring Meetup 2021:** "Revolution in e-commerce with ScandiPWA". Talk featured in the Progressive Web Apps publication on Medium ([read article](#)).
- **AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents.** Udemy · Apr 2026.
- **JavaScript: The Advanced Concepts.** Zero To Mastery · Oct 2025.
- **Microfrontends with React: A Complete Developer's Guide.** Udemy · Sep 2023.
- **Machine Learning & Data Science Bootcamp.** Zero To Mastery · Feb 2022.
- **Next.js Developer.** Zero To Mastery · Jan 2022.
- **Vue Developer.** Zero To Mastery · Apr 2021.
- **React Developer (w/ Redux, Hooks, GraphQL).** Zero To Mastery · Aug 2019.
- **PHP & Laravel Developer.** Udemy · Jan 2018.
- **Complete Web Development.** Udemy · Aug 2016.
- **BSc Computer Science,** Emaan Institute of Management and Sciences, Karachi · 2019 – 2023 · NACES/IEE: U.S. equivalent.
